## SPONSORSHIP PROGRAMME

### Welcome

The Mediterranean coastal city of Limassol in Cyprus, a top holiday destination, is hosting the 24<sup>th</sup> International Conference on Telecommunications (ICT 2017). This year's theme focuses on intelligence built into devices, systems, and processes. The ample computation, communication and sensing/actuation capabilities offered by increasingly miniaturized and low-cost electronic devices are enabling a myriad of new applications with transformative implications to numerous economic sectors. We have reached a point where intelligence built into these devices enables, for example, the realization of affordable and useful smart homes and smart grids, autonomous vehicles, and unmanned aerial systems; all of which have tremendous impact on their own but more importantly in conjunction with each other.

The ICT 2017 conference will be a great opportunity to introduce your organization / product to a vast group of European and International delegates and complement us with your presence.

### General Information

The ICT conference has been notably successful in bringing together academia, industry, and policy makers working in the exciting area of telecommunication systems and networks.

The conference attracts world-leading researchers and practitioners, around 150-200 individuals, from around the world, that present and discuss advances achieved in hardware, software and co-design of telecommunications systems and networks. All presented work is peer-reviewed by world-experts in the field and is published in IEEE Xplore as well as other Abstracting and Indexing (A&I) databases. The conference will host 3 keynote speakers discussing advances in the physical, network and application layer.
