

24<sup>th</sup> International Conference on Telecommunication  
**ICT 2017** “Intelligence in every form”

May 3-5, 2017  
Limassol, **Cyprus**  
St. Raphael Resort

## Organizing Committee Call for Papers

### General Chairs:

**Hamid Aghvami**  
King's College London  
**Georgios Ellinas**  
University of Cyprus

### Technical Programme Chairs:

**Christos Verikoukis**  
CTTC Spain  
**Vasos Vassiliou**  
University of Cyprus  
**Luis M. Correia**  
IST-University of Lisbon  
**Paolo Bellavista**  
University of Bologna

### Workshops & Tutorials Chairs:

**Homer Papadopoulos**  
NCSR Greece  
**Panayiotis Kolios**  
University of Cyprus

### Publicity Chairs:

**Mona Ghassemian**  
Shahid Beheshti University  
**Ioannis Psaras**  
University College London  
**Michael Sirivianos**  
Cyprus University of Technology

### Publication Chairs:

**Symeon Chatzinotas**  
University of Luxembourg  
**George Kamel**  
University of Surrey

### Important dates

Paper submission deadline  
**February 24, 2017 - Final**

Notification of acceptance  
**March 8, 2017**

Camera ready deadline  
**March 24, 2017**

The Mediterranean coastal city of Limassol in Cyprus, a top holiday destination, is hosting the 24<sup>th</sup> International Conference on Telecommunications. This year's theme focuses on intelligence built into devices, systems, and processes. The ample computation, communication and sensing/actuation capabilities offered by increasingly miniaturized and low-cost electronic devices are enabling a myriad of new applications with transformative implications to numerous economic sectors. We have reached a point where intelligence built into these devices enables, for example, the realization of affordable and useful smart homes and smart grids, autonomous vehicles, and unmanned aerial systems; all of which have tremendous impact on their own but more importantly in conjunction with each other.

ICT 2017 invites world-class researchers to share their ideas and progress in addressing challenges faced in this increasingly intelligent realm of information and telecommunication technologies as part of a rich conference program including Plenary Talks, Tutorials, Workshops as well as Regular and Special Sessions.

Accepted and presented papers will be published in the conference proceedings and submitted to IEEE Xplore as well as other Abstracting and Indexing (A&I) databases.

Main topics of interest include, but are not limited to:

- Next generation (5G) mobile communications
- Heterogeneous networks and small cells
- Big data networking
- Protocols, architectures and applications for the Internet of Things
- Network functions virtualization and software defined networking
- Green communications and energy efficiency
- Self - organizing/self - deploying networks
- Cognitive radio and networks
- Wireless sensor and actuator networks
- D2D and M2M communications
- Ad - hoc communications
- Cooperative communications
- Multi - antenna and beamforming systems
- Game theory for communications
- Signal processing for communications
- Wireless communication testbeds, measurements and modelling
- Optical networks and converged optical-wireless networks
- ICT for smart cities
- Smart grid communications
- Powerline communications
- Molecular, biological and multi-scale communications
- Vehicular networking
- Pervasive and mobile computing
- Cloud computing
- Satellite & space communications
- Emerging WLANs, WPANs and WMANs
- Optical communications and technologies
- Wireless optical communications and VLC
- Information theory, channel coding and joint source channel coding
- Network coding techniques
- Image processing, video compression and coding
- QoS provision and management
- Metrics and models for QoE
- Multimedia and virtual reality
- Cryptography and network security
- Standards for communications and networking
